BISNIS Trades and Tenders

Industry: Apparel, Footwear & Textiles

Country: Russia, Siberia

Company: Stock-Center (TM)

The Stock-Center (TM) is a boutique on the central avenue of Tomsk City. This outlet supplies variety of apparel of famous brands, in all sizes and at reasonable price. It became popular in Tomsk and in adjacent regions. At present Stock-Center searches direct contacts with western suppliers of discounted fashionable apparel for direct purchase or to become a distributor in Siberia.

For more information please visit:

<http://www.bisnis.doc.gov/bisnis/toplead.cfm?3212>

Industry: Apparel, Footwear and Textiles

Country: Russia – Urals

Company: Lotsia

LLC Lotsia works as a manufacturer and retailer of industrial clothing, footwear and protective equipment. Client base consists mostly from Urals region large industrial and constructional enterprises. Lotsia has 2 own manufacturing plants.

Lotsia LLC intends to set a joint venture, to organize a manufacturing technologies transfer, to purchase a reference sample in order to estimate a market capacity on an Oblast and regional levels.

BISNIS Search for Partners

Industry: Apparel Footwear and Textiles

Country: Gorgia

Company: Geotex

Established in 2000, Geotex is the sole manufacturer of socks in Georgia. Geotex produces men's socks (80% of business), as well as various types of customer tailored knitwear(20%).

The company is looking for a U.S. company that would be willing to help to modernize production. The company is interested in modern machinery under a reasonable finance plan, and is willing to cooperate fully and provide financial disclosure in order to secure a transaction.

There is a stable and fixed market demand for the product in Georgia.
Population of Georgia is 5 mln and population of the three republics of the South Caucasus is 17.5 million.
There is an advantage in the fact that practically all knitted goods in the South Caucasus republics are currently imported. Geotex is capable of producing a similar quality product at a substantially lower cost.
Profitability is high and will further increase after modernization of the production facilities.
