

Kinstellar supports Ukraine in its reconstruction efforts and launches dedicated Ukraine reconstruction projects website

July 2025 — Kinstellar has launched a firmwide initiative to support Ukraine in its recovery and reconstruction efforts.

Our Kyiv Office continues providing full commercial counsel and legal support in Ukraine to international and domestic clients, with particular emphasis on the **Infrastructure & Construction, Defence, Energy & Projects**, and **Mining & Minerals** sectors. The Ukrainian government has given top-priority to these areas, and our team closely monitors related opportunities for our clients.

We also draw on the combined experience of our 300+ lawyers in 12 jurisdictions in Central and Eastern Europe (CEE), Southeast Europe (SEE), and Central Asia to assist clients in some of the most ambitious reconstruction projects in the region.

To support our clients in this initiative, we have launched a dedicated platform, <https://ukrainereconstruction.kinstellar.com>. The website covers sector updates, legislative frameworks, specific investment projects, and legal services we offer clients exploring impactful investment opportunities in Ukraine.

Kinstellar Managing Partner, **Kristof Ferenczi** comments “*Kinstellar has been firmly standing with Ukraine and our Kyiv team and we remain committed to Ukraine and its remarkably resilient people. As a firm, we actively want to contribute to Ukraine’s recovery and reconstruction efforts together with our Kyiv colleagues and relevant experts from across our firm.*”

“*I am very proud of the resilience of our team in Ukraine. Overcoming extreme challenges, our people have gone the extra distance to support our clients to date and will continue to do so going forward,*” adds **Olena Kuchynska**, Kyiv Office Managing Partner.

We invite you to visit our dedicated website to read [Challenges and Opportunities: Rebuilding Ukraine's Post-War Infrastructure](#), authored by our Kyiv Partner, [Oleg Matiusha](#), Head of the Ukraine Infrastructure, Construction and Transportation practice, setting out the infrastructure regulatory landscape, public private partnership reforms, and donor-backed financing models in Ukraine.

Please do not hesitate to contact us for your Ukraine reconstruction enquiries.
